PRESS RELEASE AW18

Leaflike

Tropical Art Deco with a twist of Nordic nature

Lucie Kaas and the design duo Nordvink introduce Leaflike – a series of graphical leaves in different colored metals.

Anne Nørbjerg and Sanne Kyed are the designers behind Nordvink. The pair have an experimental approach to design by exploring function together with new combinations of materials. Taking inspiration from the Danish nature, the designers transformed the shape of the leaves into a graphic and decorative object. The leaves, Alva, Nova, Hela and Silva add a tropical Art Deco style with a twist of Nordic nature to the home. The material, different colors, coatings and finishes are a conscious choice in order to bring some contrasting features into the home. The metallic colors catch the reflections of light while the pink and black colored leaves create a harmonious look.

ANNE NØRBJERG AND SANNE KYED ABOUT THE DESIGN: *"With Leaflike we have taken leaves found in nature and interpreted and transformed them into graphical objects. The golden and matt colors add elegant and light contrasts to the home."*

Leaflike can add life to the empty vase, or be combined with flowers or large leafy stems to create an elegant and unique centerpiece. The leaves can also be used as wall-art with a cleverly placed hole at the very edge of the stem allowing them to be hanged.

ABOUT NORDVINK: Nordvink was established in 2013 by Anne Nørbjerg and Sanne Kyed. Both hold a Cand. Arch. from Aarhus School of Architecture - Design and Social Innovation.
Nordvink's design philosophy is guided by the concept of creating products resulting in solutions for everyday situations. They see the world from a user's point of view. It is here they find inspiration to challenge normal behaviours as well as designing products to meet unrecognized needs.
Nordvink is part of the new and young generation of designers, where the approach is guided by curiosity and empathy. This starting point results in innovated products where aesthetics and function come together through their designs.

The Leaflike series is available from October 2018.
