london

We are thrilled to announce our new collection of

Wall décor – Clocks & Wall art

Brookpace Fine Art manufactures a selection of highly decorative pictures like reproduction maps and oleographs featuring a hand-finished technique that recreates the character of an original oil painting.

Our new Entomology collection features over 40 detailed images including insects, beetles, moths and butterflies, each laboriously photographed by renowned micro photographer David Spears. The magnification of these specimens shows astonishing details and colors, dramatic forms and nature at its most sophisticated and beautiful. Truly mesmerizing!

This season we are completing our famous dog characters oleography range with some quirky gents and ladies with animal heads. Blending classic and modern, these surreal reproductions will fit with any interior with a sense of humor. Hope you like it!

The impressive Manhattan range includes iconic photographs of Hollywood and British stars from Audrey Hepburn to Kate Moss, striking city architecture from the Eiffel Tower to London Bridge and legendary sporting moments from the British Grand Prix to polo. The Versailles collection of historic and well-known newspaper front pages depicting memorable moments from our recent past.

Lascelles London have been making clocks that follow current trends in interior design but yet have a definite link to the past. The design team captures the essence of past periods like Art Deco, 50's Retro and Victorian Classics to give each clock their authentic feel. It's this attention to style and detail that people genuinely appreciate about the Roger Lascelles clocks and sets them apart from others.

This season, we are launching new funky deco along with timeless retro clocks to add a touch of colour, a cutting edge oak cased clock to pair with the contemporary copper styles and new alarms. We are also delighted to offer a range of **Smiths** trademarked wall and mantel clocks, influenced by much of the Smiths style and design, as a tribute to undoubtedly the greatest British clock manufacturer of the 20th Century. Discover also our new personalised clocks - the perfect gift for any occasion !

A curated combination of boundary-pushing use of designs and material that will instantly boost the appeal of any room. A bold mixture of past and present that are ideal in both domestic and commercial interiors.

“Our vision is to continue to build on our strengths in design and quality to bring our customers the very best products to add style, glamour and luxury to their interiors.”

Gerard Bendien

We work with some of the most prestigious design led stores including Liberty, John Lewis, Mark & Spencer, Heals, Debenhams, Laura Ashley in the UK / Gump's in the USA / El Corte Ingles in Spain / Roche Bobois in France besides many more department and independent stores, museums such as Rijksmuseum in Amsterdam, Imperial war museum in London, and interior designers worldwide.
