---

- ❖ Feeling Safe is a basic human need and part of the foundation that allows us to relax and open up to the world around us. Feeling safe isn't just a sense of physical well being! It's a sense of emotional and psychological well being. Over many years i've observed that our memory of smells is much stronger than visual or auditory memory. I clearly recall the familiar fragrance of chamomile from my childhood. It's aroma reminds me of many events in the past. When i smell chamomile i breath in it's aroma my brightest memories and become happy and content!!! Home candle will help you relieve depression and reduce your anger!

# LIFE | It's beautiful...isn't it?

---

- ❖ The life that we live is a reflection of our thoughts! A directed thought is the starting point on the path to change. The glow and pleasant fragrance of vanilla is linked to joy and relaxation! Inhalation of a vanilla scent can help treat both mental and physical problems. LIFE candle will become a visual reminder of your new ability to win over yourself.
