

# Françoise Delaire Créations - Press Release

## Maison & Objet - January 2018 : "Dans les coulisses..." ("Backstage")

Françoise Delaire Créations, is a world of textile with no frontiers between the material, the gesture and the dream. The material of choice for Françoise is a man-made fishnet with a smooth and transparent appearance, light to the touch, full of spring and tone, and with it, Françoise becomes engaged in the delights of the gesture of hand.

Françoise Delaire has filled the new Craft space with a new collection called "Dans les coulisses..." ("Backstage") of a theatre, an opera, a fashion show?

The lamps are dressed in their party finery. A bustier leads the dance and is surrounded by slips which flit around, diffusing shades of green, turquoise, emerald and pink. These sparkling garments are accessorised with adornments of jewellery or other amazing forms.

The world is intact, light, transparent, diaphanous and colourful. As always, Françoise has given a good snip of the scissors to observed trends and offers her French and international clientele, resellers and influencers, jewellery, luminous sculptures, paintings and sculptures of breath-taking colours and volume.

Françoise welcomes you to her stand at No. I51- Hall 5A.
