Easy to hang
Good color pastness

DESIGNED AND MADE IN FRANCE

Season Paper collection was created in April 2012 by two textile designers, Julie Costaz and Mélissa Le Vaguerèse in a small studio in Montreuil. Patterns, colours and materials lovers, we imagine, design, manufacture and distribute a line of stationery goods. We create 2 collections per year based on the inspiration of the moment. Our products are imagined in Montreuil and manufactured in Paris and in the centre of France. We take great care in selecting beautiful materials. All of our papers are from sustainable forests in Europe and we use vegetable inks to print most of our products. All our designs are hand-drawn by pencil, felt pen or painted in a feminine, soft and timeless spirit. They are then reworked on computers and printed with love.

A small, light-colored wooden bedside table with a flat top and four legs. On the table, there is a stack of three books. The top book has a dark cover with the text "LIFE AT THE EDGE" visible in white. The table is positioned to the left of the bed.

A tall, black floor lamp with a thin, adjustable neck and a dark, rectangular shade. It stands behind the head of the bed, casting light onto the patterned wall.

A glowing, cylindrical lamp with a warm, yellow light. It has a distinctive design with vertical, curved slats that create a cage-like appearance. The lamp sits on a wooden base and is positioned to the right of the bed.
