**But what does this mean?**

Well, Craftsmanship is the quality that comes from creating with passion, care, and attention to detail. It is a quality that is honed, refined, and practiced over the years.

The brand pays attention to the little details as well the object's durability and this is something that craftsmanship does too. So, in a rare case, designers and artisans have acknowledged that it was important the effort and time dedicated to honoring the craft. This was the key to earning the respect of clients and customers.

Obviously, Craftsmanship isn't something that just happens, it requires a great deal of time, patience, and effort. Traditionally, craftsmen developed their skills through apprenticeship to those masters of the craft who came before them.

To explain this even better, let's see some of the products that were **handmade** and that are some of the must-have of **Maison Valentina**.

The name of this contemporary bathtub and the Japanese word for love are homophones making the carp a symbol of love and affection
