Himla presents AW18

This fall, warmer and natural tones take over as a base in the decor. They are soft, warm but above all they create a comfortable calm. From the nature scale we work with colours like Cream, Taupe and Woods

To create effect and change, we bring in colors like the playful yellow shade Yellowish, a more dramatic deep red Maroon and finally for all of us who love the blue scale - Petroleum and Lyric. All colours are so beautifully expressed in the different structures of linen.

Welcome to visit us in our stand at Formex, Hall A Monter 03:14.

HIMLA is not one style – it's all styles

For more than 27 years, we have lived by one simple idea. Himla is not a temporary style that quickly goes out of fashion. We create beautiful textiles for every room. Most of our products are made of linen, but we also work with other natural materials like wool, silk and cotton.

HIMLA is a Swedish interior design company, which represents Scandinavian simplicity and creative variations in a meaningful way.
