## The PÉPITES collection

created by Mariela Schwarz Montiel

Mariela Schwarz Montiel has created the Pépites collection to present and serve the most refined delicacies.

Sculpted like gemstones, with faceted sides enhanced by the matte finish of the porcelain, these stunning pieces bring a touch of magic to presenting small tasting portions, tempting guests to discover petit-fours and appetisers, as well as accompaniments to dishes, condiments, butter, olive oil or chocolates, which they showcase with poetic charm and mystery.

# The PÉPITES Collection

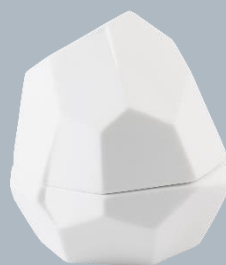

created by Mariela Schwarz Montiel

The Pépites collection comprises three pieces in contrasting shapes and sizes to suit all serving requirements.

Rock with 3 secrets is composed of three base units topped by a lid: the deep base can contain liquid, a shallower middle unit can accommodate semi-liquids and the top flat unit can be used for a petit-four. This is a perfect piece to gradually reveal an assortment of different concoctions.

Diamond with 2 secrets is composed of a deep base and top unit for liquids and semi-liquids with a lid shaped like the tip of a diamond.

Lastly, Stone with 1 secret is composed of a shallow base topped by a lid for the smallest presentations.

As always, Raynaud has enjoyed creating containers suited to a variety of textures and preparations, in order to assist the culinary creativity of chefs.
