

DARE TO BE UNIQUE

Dare to be ... in Gold

Autumn has set in and winter is coming. The end of the year festivities are an opportunity to create lots of special moments to share with our families and friends. To recreate our childhood feelings of excitement and wonder, we redecorate and transform our interiors. To create this very special atmosphere, we suggest pyrite. A naturally golden stone, so golden that the first prospectors of this metal literally went mad with joy at the thought of their new found fortune. But this is not gold, it is an impressive mineral with a highly contemporary look and perfectly geometric crystals. A half-way house between tradition and modernity.

Dodecahedral Pyrite on brass stand. 9.3Kg : Massive block of a rare form of Pyrite: the Dodecahedral prism shape (12 faces crystals) from Peru. This metal, also called fools gold, has the golden hue of gold, but a higher melting temperature: 1180 degrees celcius.And definitely a lower price... #oneofakind

Lapis-lazuli 2.6kg on brass base The best Lapis-Lazuli come from the north of Afghanistan (Badakhshan province). The mines in this narrow valley, often covered by snow, have been exploited for 6000 years! The Sumerians and then the Egyptians seemed to value this incredibly blue stone, as many statues and beads, have been found in the tombs of the most important peoples. This mineral is composed of 14 different elements, but the most important is the blue Lazurite and an extra value is added by the shiny Pyrite that made a golden line on this piece. #oneofakind

Fluorite with pyrite from Morocco, on brass base These translucent cubes with a green tint, more concentrated in the center are typical Fluorites. They can be found in different places of the world, but those of El Hamman in Morocco (near the city of Meknes) are of an incredible purity. The main vein that is worked for an industrial purpose is 4 Km long. And the specimens that we collected in 2015 have the peculiarity to be covered with pyrite: golden stars reflecting in an ocean... #oneofakind
