

# LORENA CANALS NEW COLLECTIONS, 2019

## Tribute to Cotton. English Gardens and Lobster

[Official Launch at Maison & Objet, Paris, 18 January 2019](#)

Lorena Canals will present at the next edition of **Maison & Objet, Paris, 18-22 January**, her three new collections of washable rugs and decorative accessories: **Tribute to Cotton, English Gardens**, and **Lobster**.

These three new collections have been inspired by the brand's origins and the designer's love for nature. These passions have been transformed into cohesive and comprehensive collections, with a great focus on elaborate details.

The collections will also be presented at **NY Now, New York, 3-6 February**, and at **Intergift, Madrid, 6-10 February**.

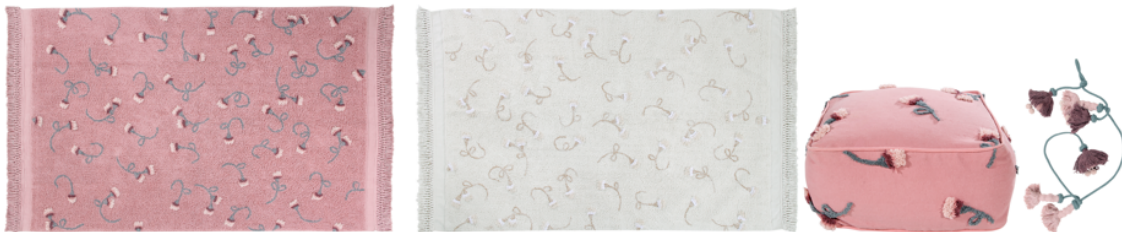

**Craftsmanship:** The ethos of Lorena Canals was built around the attributes of cotton – it's versatility, warmth and softness, amongst many others. So, it was only natural for Lorena Canals to pay homage to this safe and eco-friendly natural material with the **Tribute to Cotton**. This collection transports us to India's endless cotton fields, thanks to its soft tones and variety of textures, and is one of Lorena Canals most comprehensive collections, with different models of rugs, cushions, baskets and garlands. This collection is a tribute to a material which represents the values of Lorena Canals, such as craftsmanship and a commitment to safe guarding the environment.

**Elegance:** The **English Gardens** collection is inspired by the richness of colors and textures experienced in English botanical gardens, which captivated the designer as a child. Nature teaches us the importance of small details, and this point is highlighted by the elaborate finishes in this collection and the introduction of a new type of handmade knotted fringe. This collection has the largest number of accessories, comprising of baskets, a puff and garlands in pink, mauve and white with renewed and elegant floral designs.

**Joy:** As a loyal lobster lover and all things maritime, Lorena Canals launches a fun, marine style collection: the **Lobster** collection. Having grown up by the sea, Lorena Canals has turned her childhood memories into fun carpets and wall hangings, with matching baskets and door hangers, in intense red and natural tones with textures that seem sprinkled by the wind and sea water and softened by the white sand.

Lorena Canals' award-winning designs have garnered international attention for being modern & stylish, yet practical & safe for children. Our fair-trade products are handmade by expert craftsman in India, who use raw materials of the best quality. Our rigorous artisanal process produces environmentally friendly, machine washable rugs and decorative accessories made from natural cotton. All designs are hand stitched and dyed with natural, non-toxic dyes, to ensure durability after washing.
