

## THUMBS UP FOR THE LÄSSIG'S NEW COLLECTION GARDEN EXPLORER

"Hey ho let's grow" – When you see the new GARDEN EXPLORER collection from LÄSSIG you'll just want to get outside. The new design encourages little foodies to discover nature at the table and hopefully celebrate young vegetables. The new children's tableware is decorated with intricate drawings with a nature theme and illustrates first encounters with the garden in an extremely charming way. Porcelain or renewable raw materials, anyone with green fingers will love it.

The new collection is available in two colour and design schemes. In blue with the tractor as the main motive or terracotta with the snail.

### Porcelain Tableware with silicone

The children's tableware with dainty garden designs is impressive with its clever combination of materials: fine porcelain harmonises with a non-slip silicone ring. The removable silicone ring on the underside of the plate, bowl and cup ensures stability at the table as it sticks to any smooth surface. This makes stress-free mealtimes possible.

The children's plate, small bowl and cup can also be purchased separately.

The porcelain tableware set consists of one plate, a small bowl and a cup.

**Innovation in the composition:** The high quality combination turns out to be both elegant and practical when little hands are prone to test the force of gravity. Porcelain brings exceptional qualities to the table: porcelain scores points with its elegant sheen, but at the same time, it is extremely scratch resistant and can retain heat better than other materials.

**Sustainability point:** When the child is bigger the tableware can also be used without the silicone ring. The porcelain tableware set is dishwasher and microwave safe. Not affecting taste or smell, the dish is free from harmful substances and suitable for 3 years and up.
