Eagle Products Home Collection Autumn/Winter 2020 - For a safe and cozy home

Where do we feel safe? What do we need to feel good?

We know that better now than we did a few months ago. A cozy home is definitely one of them. Plaids, blankets & pillows provide warmth, security and the right dash of color in the right place.

Our in-house designers, together with our experienced production team, have created many new items for this very special autumn / winter season. Thanks to our own production in Germany and secure European supply chains, we can promise secure delivery dates for orders.

What are the new color and material trends for the autumn / winter season? The trend themes range from warm natural and gold tones for the catchphrase "Nesting" to rich gemstone colors in the "Glam Look" to calm shades of green and gray in the chalet style for "Der Berg ruft". New developments such as extra heavy and oversized plaids for cozy cuddling, many new pillows or large jacquard designs underline the trend towards "nesting", building a nest at home, the safe place where you feel safe. But also colorful multicolor designs with stripes, checks or as patchwork pillows enliven the living space and exude joie de vivre. Several new plaids made of cashmere in casual and classic styles round off the new collection in style. Immerse yourself in the different living worlds of the Home & Lifestyle Collection A / W 2020 from Eagle Products!
