# The art of the table

“The thickness of things” highlights the materials and textures. This new collection succeeds in highlighting the density of our materials around two main themes: Galent Green and Black is back.

The two themes:

“GALANT GREEN”

Like Proust’s madeleine, this theme is a gentle reminder of childhood and more broadly, an ode to memories.

The large tables, those decorated with old linen and beautiful objects, inspire and seduce us. Embroidery, vintage art from the time, dresses our linen finely. It represents very small motifs drawn from vegetal and mineral nature: bouquets of mimosas and bees made of gold thread. These patterns and colours enliven our linen that we will pass down to future generations, along with the family rituals that leave us a taste of childhood and mischief.

“BLACK IS BACK”:

Contemporary and graphic, black, always timeless, returns in small touches in the interiors. For spring and summer, black is softened into midnight blue and retains the purity and the naturalness of the interiors. It works perfectly with white. Secret coves lined with sandy paths, cypresses and myrtle bushes... the richness of the details of the Presqu’île motif invites dream and imagination.

The 3D cube iconic motif is transformed by the magic of digital printing. It enhances our linen by lending it an additional texture. Broken down into blues, olive green and silver, these three variants are synonymous with modernity, chic and simplicity
