

SOPHISTICATED MIAMI LIVING

ALL ABOUT THE DETAILS

PULLCAST

JEWELRY HARDWARE

MIAMI PENTHOUSE PROJECT

Founded in 2005 in Switzerland by Céline Demole, Dôme Project Interiors was born from an intense passion to turn interiors and furniture into art, conveying the soul of their clients in the projects they create.

Dôme and PullCast strive for a common goal, to surprise and turn projects into unique and true masterpieces. With these common values in mind, a luxurious penthouse in Miami was born, designed by Dôme Project Interiors and with high-end jewelry hardware signed by PullCast.

Dôme Project Interiors, while looking for the best and most unique products on the market, has discovered PullCast Jewelry Hardware, a Portuguese brand of decorative and architectural hardware that take as primary inspirations the simplest elements of nature to the most extravagant details of cosmopolitan life.

“EVERY DETAIL MATTERS”

This project was carried out in a prestigious apartment located on a very exclusive island in Miami.

The project covers 800-square-meters and also the property has a 200-square-meter terrace overlooking Miami Beach.

The Dôme Project Interiors team worked on an Art Deco theme, ingeniously exploiting refined finishes and details. The aim was to create a gracious and elegant interior through the use of noble and natural materials, such as mother-of-pearl and shagreen, subtly creating a perfect balance in textures and visually emphasizing the elegance of both the architectural features and the luxurious furniture pieces.

The jewel of Dôme's project was the 200-square-meter lounge with a spectacular panoramic view of the ocean and South Beach. The sofas and armchairs in this beautiful living area were designed by Dôme and custom made in high-end quality in order to match this imposing and polished ambiance.

Featured in this project, Comb drawer handle, Kesya cabinet and drawer handle, Catha drawer handle from PullCast's Earth Collection and Pebble drawer handle Natica cabinet handle, Caviar drawer handle from Ocean Collection.

In the dining room, a hand-painted impressive panorama wallpaper offers audacity and sophistication. A custom made wooden trellised panel gracefully separates the dining room allowing circulation of light and creating an eye-catching flow between spaces.

The use of lacquered wood adds warmth and an exotic feel and is a recurrent element of the project creating unity in all rooms. Present in the master bedroom's dressing room, it is heightened with sumptuous handles designed and created by our team.

For the bathroom furniture, Dôme Catha and Kesya drawer handles, bringing elegance and sophistication. Catha vigorous forms resemble the calm after the storm. A force of nature ready to become a cut diamond in your designs.

The master bedroom is characterized by a crisp and lavish panoramic wallpaper catching the eye from behind the headboard, and further enhanced by the two pendant lights with gleaming dripping glass decorations.

Also in the other bedroom the nightstands have Pebble hardware from Ocean Collection. This furniture drawer handle is smooth but with an irregular texture, portraying the strength of the sea and the marks of contact with other rocks when wounding in the waves.

For the closet doors, Dôme Project Interiors choose Kesya cabinet handle, an elegant and stunning cabinet hardware. Portraying a coming back to the roots and evoking prosperity. Kesya inspiration was drawn from the very uneven texture of the bark pine tree, known by its endless evergreen. Enhancing this closet ambiance with its strong character and unique shape.

For those who wish to have a project reflecting their soul and essence, it is possible to get with Dôme Project Interiors.
