

Candleholder KATTVIK is a unique, lovely mood enhancer which can be used all year round - both indoors and outdoors.

Smart and timeless design with storm glass and air inlet allows the candlelight to burn without the flame blowing out and minimizes the risk of fire. The glass's reflection of the light flame enhances the mood. Stable and smooth foot keeps the candleholder standing even in strong wind and takes up little space on the table. Much appreciated by families (especially with children), restaurants and pet owners.

Materials:

Brushed stainless steel, Nickel-plated brass/shiny silver and Brass, polished, varnished.

Measurements:

Height 250 mm (with glass). Diameter foot 90 mm. Diameter glass 50 mm. Weight 450 grams.
