

PRESS RELEASE 01/2019

AVALÁN, the Automobili Lamborghini audio system inspired by the Huracán Performante

Modena, March 25, 2019 - The first audio system inspired by the Lamborghini **Huracán Performante** could only be born in the land of engines, a few kilometers from Sant'Agata Bolognese.

It is made by **IXOOST**, a Modena-based company that has amazed the world with its exclusive sound systems that combine design, high-level mechanics and sound quality in a series of creations handmade for the most demanding motor enthusiasts.

After the success of **ESAVOX**, now it's up to **AVALÁN**, the latest creation of **IXOOST**.

A meticulous study led **IXOOST** to create an object that immediately recalled the style of the **Lamborghini Huracán** in the **Performante** version. **AVALÁN** has been structured like a supercar: bonnet in monocoque in carbon polymerized in autoclave at 6 bar, **original Lamborghini exhaust system** with reflex pressure control and front grille, an hexagonal design obtained from solid.

Every component of the audio system has been rigorously hand-made by the best craftsmen, those who have made the history of the Italian Motor Valley and who still create the supercars of the present and the future.

AVALÁN is a small sound system that encloses a motor with the latest Bluetooth® 4.0 technology with aptX® decoding and is equipped with two 4-inch "made in Italy" drivers, positioned laterally to the cabinet and able to give a unique stereo experience. Finally, the two one-inch tweeters positioned at the edges reproduce all the wonderful details of the music with a uniform sound distribution.

Specifications

- Body in polymerised Twill 245 3K carbon
- Couple of original Lamborghini exhausts
- Bluetooth® 4.0 - aptX® decoding
- 1 2 × 100 watt amplifier for tweeter and midrange
- 2 1 "tweeters
- 2 4 "midbass

DIMENSIONS | WEIGHT

12 kg | 63 x 24 x 32 cm (W x H x D)

iXOOST signs exclusive audio systems built entirely in Modena with the same techniques, the same materials and the same passion with which the most famous supercars in the world are made. These extraordinary audio docks represent the iconic transformation of elements of the automotive and aeronautical universe into unique objects. Every single piece is handcrafted and assembled, integrating elements and construction features of the most famous supercars born in the Italian Motor Valley.

iXOOST® is a registered trademark owned by iXOOST srl. The use of a true collector as an integral part of the dock is an exclusive patent of iXOOST srl; all other names or brands or combinations of them are the property of their respective owners.
