## « New- York » in Ardèche

*« Fellows » by Elisabeth Bourget at the castle*

For the past ten years, Liviers Castle ([www.chateau-de-liviers.com](http://www.chateau-de-liviers.com)), a tourist and seminar center located in the heart of the Ardèche, has given pride of place to the creations of Elisabeth Bourget. His "Bonshommes" punctuate and signal the different spaces of the domain.

Jean-Luc Humbert, owner of the place, a great lover of arts and crafts regularly makes orders and acquires creations over his favorites.

His latest acquisition is entitled "New York", a wink to the famous photos of workers on skyscraper yards in the 1930s. She has now found a surprising and impregnable place on the panoramic bottom of the Ardèche mountains.

In addition to the "Fellows", Elisabeth Bourget finds in the area of the Château des liviers a superb setting to highlight its different modes of expression: jars, "Rocks" ... a decorative panel is currently being installed.
