

## ESPRESSO DOPPIO | Thermo mug

---

ESPRESSO DOPPIO thermo mug:

Two are better than one – double insulation means a warmer drink

The Viennese style small espresso with the full flavour has long been a feature in our kitchens, cafes and clubs. But you rarely see them on the go – espresso connoisseurs pursuing their passion in public. But all that could now change with the new ESPRESSO DOPPIO from TROIKA.

The small thermos mug made of high-quality stainless steel makes an espresso to-go really enjoyable. With its double wall insulation, ESPRESSO DOPPIO holds 160 ml of liquid – e.g. a double espresso – hot for a long time. With its clever sliding closure, the mug can be opened and closed effortlessly, and thanks to its built-in rubber seal, it's spill-proof.

ESPRESSO DOPPIO fits all standard coffee machines and cup holders and can be used as many times as you like – avoiding unnecessary waste from paper cups. The concept and design of the thermos mug come from the TROIKA Design Workshop. The small thermos mug is available in matt blue, matt silver and matt black.
