1. Add a Luxury Rug to Your Bathroom

Bathroom Design by *Maison Valentina* and *Rug's Society*

No bathroom can be complete without a rug. – While most people might fall into the habit of getting just any rug – our recommendation is that you put a little bit of more thought into it. Investing in a luxury rug for your bathroom is basically an instant and very noticeable way of adding a luxury feel to it. Nothing can be more rewarding than getting home after a long day, taking a shower, and letting your tired feet feel the soft tenderness of a luxury rug.

2. Invest in a Unique Mirror Piece

Bathroom Design by *Maison Valentina*

After a rug, comes a mirror. This is another bathroom design piece that can never be absent.

It is not only useful, but it is also a quick way to make the bathroom area appear bigger as well as more elegant. When you enter a bathroom, the mirror is the first place where you are gonna look, so it is important that you choose it carefully. Plus, this is always a fantastic way to introduce some of your own personality in your bathroom design.

3. Colours, Patterns, Shapes

Another fantastic way to bring luxury to your bathroom is by adding more texture and colour to it. From wallpapers to tiles or even innovative wall stickers – creativity is the way to go about it. For a luxury bathroom design, tiles are the right path to take, still, if you don't want to cover the entire bathroom wall with a bold print, the patterned tiles can be used to create a point of interest on the walls or on the countertops.

4. Luxury is in the Details

Via Pinterest

This one is a super easy tip to apply to the bathroom. As we all know, luxury is in the details so placing your daily routine products in a unique and elegant way, will make all the difference. An example of this could be placing your bathroom essentials in a stylish golden tray. – Metallics, natural stone, and marble finishes are the way forward when it comes to luxury bathrooms.

5. Make it Nice and Bright
