

VERDIER

MANUFACTURE 1859

Kitchen knife packagings, presentation boxes and a small box for the pocket knives

Since April 2018 we've been working on the conception of eco-responsible packagings. Our objective is to reduce to the maximum the quantity of plastics used in our supports and packagings. In order to achieve that we've established a partnership with a French company of the Thiers region named [CIT Plus](#).

Established in Courpière, to only 20km from our production site, this family company has more than 25 years of experience in the conception and production of packagings. All their products are 100% made in France, they are certified as [Imprim'vert](#) (French certification which guarantees that the company respects [certain amount of ecological responsibilities](#)) and they also work with PEFC materials! Finally, if all that wasn't

enough, even the inks that they use are made from renewable materials.

In Verdier we're making our maximum to always work with local companies in order to reduce our carbon footprint in the planet. Apart from that, as a 100% French manufacturer, it is also our obligation and desire to work with companies who share our same values. We want to propose 100% made in France products, which include the cutlery items but the packagings as well.

Plus!

Between the 6th and 10 of September we will expose in the Maison et Objet fair! This year you will find us in the HALL 3 - STAND A45. We're also pleased to let you know that this year we're part of the [French Made](#), [Sustainable](#), [Hotel & Restaurant](#) and [Ateliers d'Art de France](#) itineraries!

We will prepare another newsletter before the show in order to inform you of all the new products that we will be presenting in the fair.. Stay tuned! And if you want invitations for the fair, do not hesitate to ask us!
