

LAPS COOLERS Design Alain Gilles for XL BOOM

The Laps coolers are high-end coolers that are both visually austere and warm at the same time, thanks their slightly curved line and generous body.

Their highly distinctive edges create a play of light and shadow. These unique steps give these coolers a geometric appearance, reminiscent of brutalist architecture. These unique “steps” are of course a nod to the Laps candleholders that are part of the same family.

Their inner side is treated in a different colour in order to re-enforce their depth and to bring a certain lightness and refinement to the pieces.

They are statement pieces intended to serve the best wines and Champagnes in the finest restaurants.

Depending on the size, they can hold more or fewer bottles.

Materials: casted aluminium
