THEMES AUTUMN / WINTER 2019

This autumn and winter it is all about nature, peace of mind, contentment and good fortune. Therefore we split up our collection in two themes; Subtle Luxury & Native Nomads. We updated our theme Subtle Luxury with new colours and materials, while Native Nomads introduces the rising of shades inspired by nature which radiate serenity.

The colours ochre yellow, green, pink, warm red and dark blue already had a strong attendance in our spring/summer 2019 collection. You will certainly see these colours again in our autumn/winter 2019 collection. Together with gold, bronze and brass, these colours give your interior a luxurious and rich appeal, as if you were living in your own private hotel room. Gold is a colour which associates with the sun, warmth and wealth. Red stands for passion, love and happiness while green gives you a feeling of good health, nature and vitality. These are all colours which give you a luxurious and rich feeling and that is exactly why you still find these colours in our Subtle Luxury theme.

This autumn/winter season you will also find more natural shades in our collection; several brown tones like sand brown, clay brown and cognac are really upcoming colours. The brown tones will slowly become more present in each interior. Also sun kissed colours such as ochre yellow, faded pink and grayed jade are natural colours which fit perfectly in this autumn/winter collection. These colours supplemented with natural materials make our theme Native Nomads complete.

Another trend colour for this season is coral pink. This colour of the year 2019 cannot be left out of our collection. We have expanded our successful range of flip clocks with two limited editions which have the coral pink as an accent colour - But there is more! In our autumn/winter collection we also have clocks, table lamps and other home décor items in this special colour.

Combinations in the interior are allowed to be a little more daring and colourful compared to last season. Everything is possible - combine colours, styles and prints. Go ahead and mix and match to make your own perfect style group.
