

From old, ruined garments to fine plaids

Once upon a time, our lovely plaids were a jacket, a pair of pants or some other garment, but in time clothes become old and worn. And at some point, it ends up being thrown out, because who cares about an old, hollowed out jacket? We do at AU Maison!

In our endeavor to use sustainable raw materials, we have designed a beautiful plaid in five different colors made from recycled materials from various garments. We have not compromised on quality and design in the process, while the price of the rug will be pleasantly surprised.

Visit us at stand F76-G75 Hall 4 and see and feel the beautiful carpets of recycled bottles, the unique rugs made from recycled leather and delicious plaids of recycled garments.
