Art Forms and Nature

The range of textile accessories for the table offered by The Napking, owned by Bellavia Ricami SpA, is increasing.

La Maison has surpassed the traditional offer of hand-embroidered objects, Bellavia's main activity for sixty years, offering an original collection of digital prints on pure linen.

Reconstructions of shapes and colors typical of the Mediterranean, compositions inspired by the futuristic graphics of the late nineteenth century, are the fruit of the work of artists who contribute to the creation of the "ILLUSTRATIONS" collections.

The novelties, presented in Paris during the September 2019 edition of Maison & Objet, include new original designs and new sizes of tablecloths in which linen is always the main protagonist of the entire collection.
