PRESS RELEASE COLLECTION AUTUMN/WINTER 2019-2020

# CON AMOR

While designing our products and composing our collections we like to let ourselves be guided first of all by the things we love: folk arts & crafts, colour, mid-century design and of course... Mexico.

Also this season various products can be traced back directly to our Latin-American roots.

Other products originated somewhere else: in an old Portuguese love story for example or in Paris and the British Essex, the places of birth of the illustrious knitting duo Paris Essex that designed a new series of pillows for us.

And a set of cheerful postcards from the Ukrainian-Canadian illustrator Helen Dardik was the starting point of a new kids collection of bags, suitcases and lunchboxes.

In the end the result is all that counts.  
And we are presenting that result enthusiastically –  
and as always: con mucho amor!
