BOKASHI ORGANKO

an assistant turning biological waste
into an ecological fertilizer

The **Bokashi Organko** composter is an integral, sustainable solution for biological waste and ecological gardening.

This composter enables you to easily produce **first-class basis for compost** and a fertilizer for your ecological garden or house plants.

Useful micro-organisms contained in the biogenic granules trigger fermentation, thus conserving most of the mineral and mineral substances.

Bokashi Organko is **impermeable to odours** and does not attract insects.

It is made out of **recycled, environmentally friendly and safe materials**.

Bokashi Organko will provide you with:

- > first-class basis for compost,
- > organic plant fertilizer,
- > natural detergent for drains.

#ZEROWASTE #REDUCE

#RECYCLE
#COMPOST

An integral solution for composting biological waste and ecological gardening

Composted biological waste from households is collected less regularly, while **the quantity of biological waste reduces by 25%** due to fermentation. The purchase of the Bokashi Organko composter will be repaid many times over in less than 1 year since we no longer need bags to collect biological waste, while composted biological waste allows us to practice self-sufficient ecological gardening.

Ecological gardeners and people who are ecologically aware also have the opportunity to benefit from the following advantages:

- > the possibility of self-sufficient ecological gardening
- > zero-waste lifestyle,
- > circular management of biological waste at home,
- > lower costs of biological waste collection, and a reduced quantity of organic waste,
- > reduction of your carbon footprint.
