BOKASHI ORGANKO

Bokashi organko is the best choice for people who are aware that their conduct always has an environmental impact.

With the right solution for organic waste processing, they act responsibly.

They do not create waste, but sources from which new life can sprout.

Organic residue is Food For the soil, in which everything grows better with the help of effective micro-organisms.

Quality basis for compost

Natural Fertiliser for garden and other plants

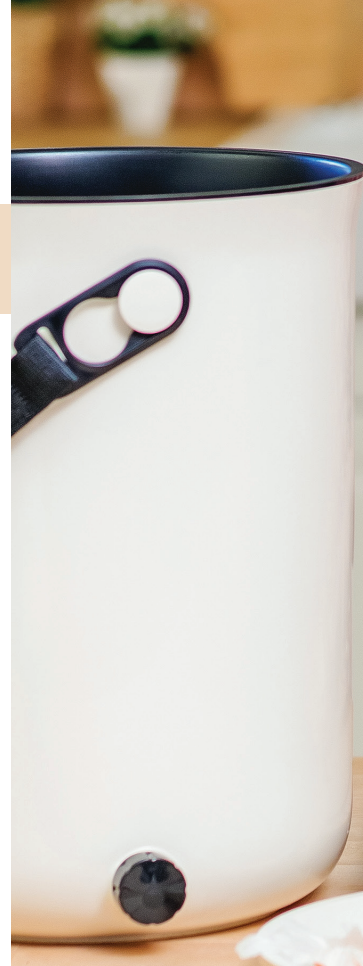

In just a decade, the **Skaza Family** company has undergone a complete makeover and turned into one of the **most inspiring companies in the EU**.

Their sustainable mindset is woven throughout each product of the brand.

Skaza company, started to **transform plastics** years ago into a material which is made of natural raw materials, and products are characterised by **zero waste management**, and a continuous cycle of recycled products ensures recycling and modification of existing materials into new areas of use.
