

HIMLA SS20

The interior design brand Himla presents an SS20 collection with shades inspired from the nature. The season has a minimalistic Scandinavian design mostly in linen, with structures and colours that can be mixed and matched for a personal style over time.

New season SS20 starts dramatically with the theme Reboot your Home where colours like Mauve are matched with a darker base. Later in the spring, updated earth colours are in focus in the theme of Earth Calling, which is combined beautifully with Himla's popular natural colours. In the summer, the inspiration comes from the Scandinavian summer with both classic and new blue nuances which create more depth.

The Himla Concept

Creating a home, or recreating a room, is a beautiful art. A cohesive home is also often created little by little. Himlas collections are not about a temporary style - every year the new collections match the previous ones. Himla is characterized by Scandinavian design and nuances, and offers a wide range of high-quality textiles made from mainly sustainable linen.
