Cloud Collection Blue

Inspired by the critically acclaimed Pixar's short animated film Partly Cloudy, this collection aims to reflect children's imaginary world. With it, you can expect your child to look upon it and travel across the threshold between reality and imagination.

By creating something unique with the use of simple shapes that reminisces us to the Memphis Design Group and the 30's Art Deco, the collection celebrates the aesthetics and the symbolism behind every piece. It stands out by its unique form and high level of design.

CIRCU'S Cloud Collection will highlight any bedroom. Every detail was made thinking about the fantasy world kids live in and how to create their own unique dream without leaving the house.

Our unique cloud-shaped bed brings not only comfort but it also transforms bedtime stories into an extra special bonding time and peaceful nights.

Complete the design by adding our new Cloud Sky Desk pieces that provide the ideal storage for your children's favorite bedtime stories and toys. Our Cloud Shelf's are also a great choice if you want to keep the bedroom organized and stylish. But this dreamy collection does not end here.

With this dreamy collection, your little one will be "Up in the clouds" using the power of imagination and living in his very own enchanted story. This Collection aims to offer you the solution to a never-ending problem: a complete, high-quality design for a kid's bedroom. With a soft-colored palette that ranges between taupe, blue, pink, white and crème, the collection fits perfectly in every project, house or concept. Handcrafted and hand-tailored with only the noblest materials, we not only created furniture pieces, but we've also created the beginning of a story: Your child's story.
