Sculpture - Porcelaine

**Maison&Objet**

**Craft - Hall 5/A Stand H-30**

du 17 au 21 Janvier 2020

Paris Nord

**Come to discover the new porcelain pieces  
by Pascale Morin.**

After being exposed

in different places and galleries in Paris and abroad, and its development with decorators in the United Kingdom and the USA during the year 2019,

**Pascale Morin exhibits at Maison & Objet in the Craft space** and will present her new porcelain sculptures. **An invitation to enter its universe and our own nature...**

**2020, Pascale Morin maintains her international direction, and presents a new creative work always in the same spirit that drives her: emotion ...**

For this 2020 session, she will present her new approach to porcelain and her latest pieces from work and research on the **materials, textures, traces** or **scars** that personalize us and that shape us.

« Entrelacs », « Ecllosion », « Gorgone », « les Coiffes » « les Astres\* »... **craters, leaves** or even entwined porcelain **corals**, placed or suspended where the harshness and delicacy, the dullness of the porcelain biscuit and the shine of the enamel merge, in all transparency.

*«Still inspired by nature, between vegetal and mineral. I'm moving closer to nature and I feel I need to understand what it's made of, its rhythms, its vitality, but in the same time, its degeneration. I'm looking for movement, the breeze, rain imprints, the heat of the sun, the brightness of waves, sea spray, the hardness and suppleness of the earth, the stillness of water and its energy. I am looking for, searching for, the emotion of living things.»*
