

EBB & FLOW wins their first Iconic Award

For the first time, EBB & FLOW has been awarded the prestigious design prize, *Iconic Awards: Innovative Interior 2020*. The title was awarded for EBB & FLOW's new, beautiful and functional Horizon ceiling/wall design.

The Iconic Awards: Innovative Interior honours only the best of the best furniture and interior in the design industries. More than that, the competition also shapes a unique platform for networking architects, product designers and property developers. The award is given by a jury selected by the *German Design Council*.

Designed by EBB & FLOW founder Susanne Nielsen, the Horizon is a statement lamp with character. Rays of light shine through the transparent glass to light up any wall or ceiling. The shape of the lamp is edgy, infinite and wide – designed to create attention with its unique look.

Handcraft is in the EBB & FLOW DNA. This becomes obvious, as the Horizon collection is made from mouth-blown glass. The lamp is finished with a gold or silver metal cover plate as well as a solid metal fitting to the back of the lamp for both wall and ceiling installations.

The lamp is available in three sizes and numerous beautiful and timeless colours. Suiting cool Nordic as well as bright and dramatic spaces, it is ideal for lighting solutions in bedrooms, hallways, restaurant areas and hotel rooms.

As part of winning the Iconic Award the Horizon design will be featured as a part of the *ICONIC AWARDS 2020: Innovative Interior exhibition* at the *Kölnischer Kunstverein* in Cologne.
