# welcome

to the ester & erik universe of exclusive  
candles, made in Denmark.

An ester & erik candle is an aesthetic  
statement, creating a unique  
atmosphere at any event.

## colours create personality

We love diversity, and therefore we have created, developed and refined a wide range of colours and unique designs. There are no limits – every season, every holiday and every event can have its own colour palette. We are convinced that colours create personality and are the starting point for a very special atmosphere in any room.

## classic & elegant

We call on the world to accommodate and embrace diversity, and therefore we deliver unique products, that comes in different colours and shapes.

Every single candle is as beautiful on the inside as it is on the outside. The aesthetic expression brings this beauty to life and inspires the surroundings to unfold creatively.

## taper candles

Our classic taper candles are the foundation of ester & erik. It was the first product we created and today it stands out as the fabulous example of our absolute bestseller.

## cone candles

Our cone candles are very elegant with a pure and classic shape. The cone candle was created as a decoration candle for Christmas. However, we soon realised the cone candle had become a popular interior candle for use all year round.

## cylindrical candles

Our cylindrical candles have a special place in our heart. In theory, this type of candle was not possible to make due to the way we create candles using our dipping process. However, 24 years ago, Erik, through dedication and stubbornness proved that in spite what everyone told him, we can indeed make cylindrical dipped candles.

## slim candles

The slim candle has been around for hundreds of years in many forms and sizes. We have with our own interpretation made a stylish slim candle, which fits most of the modern and classical candleholders. Like all the candles from ester & erik, the slim candle also has the famous conic shaped bottom and is of course also self-extinguishing.

# pillar candles

Our classic pillar candles create the cosiest moments inside every home. Because we are able to make them in our huge colour palett of more than 80 colours, they fit into any situation.

# colours turn into scents

ester & erik have brought together our love of colours with the emotion of beautiful aromas in order to write a new chapter of the ester & erik universe.

## scented candles & diffusers

The new range creates a bridge between fragrances and colours, between useful and clever designs making them last beyond their initial purpose.

The ceramic jars are handmade and the colours selected from our candle palette to match each fragrance. Our fragrances have been made by Emmanuel Martini, a world renowned perfumer who works exclusively with ester & erik.

# reusable

Our strategy of environmental sustainability is especially emphasized in our fragrance collection, where we've made all parts of the product reusable. We designed the lid to be used as a stylish candleholder for our pillar and taper candles and the specially designed ceramic jar is suitable as a vase or jewelry box.

## accessories

Our elegant candleholder holds a very special meaning for us. It was created by Erik 26 years ago, for his and Ester's 25th wedding anniversary. Today this elegant holder is an excellent example of the understated and elegant Danish design philosophy and has become a bestseller loved by many of our customers. The candleholders and accessories are available in many beautiful finishes and has later been complemented by a smaller version for our slim candles and some special plates for our cone and pillar candles.

ester & erik

All ester & erik candles are exclusively made on our factory in Denmark. Each cotton wick is carefully dipped several times in warm paraffin wax of the finest quality, until a beautiful candle is made. The dipping technique and the high quality of all components used, ensure a beautiful candle with a clean and steady flame, which slowly and elegantly burns down without smoke or drips, eventually extinguishing itself before it reaches the holder.

We love diversity, and we have therefore created, developed and refined a wide range of colors and unique designs. There are no limits – every season, every holiday and every event has its own color palette.

# ester & erik

In 1987, Ester and Erik Møller founded the company ester & erik, which today is a highly regarded brand in the interior world.

Quality and craftsmanship have always been keywords for ester & erik and our timeless candle designs never go out of fashion, which is exactly why our classic products have been around for so long.
