

On the road

Isabelle Nadeau
Atelier Terres d'Angély

After transferring plum blossoms, insects and cats, Isabelle chooses to continue these stories with the traffic signs. It is following a trip to Australia that this collection germinated with the sadly famous Kangaroo. It will be in honor of this country that Isabelle will maintain the collection.

Who's Isabelle Nadeau ?

Isabelle Nadeau qualified in chemistry and worked for several years in scientific journalism after which she decided that her true vocation was to be a career in ceramics. After one year Isabelle obtained a diploma in ceramics from the Institut de Céramique Française de Sèvres enabling her to become a professional maker.

In 2006 she opened her workshop and gallery in St Jean d'Angély in western France. Using porcelain, she throws, models and glazes both decorative and functional wares and her latest collection uses decals produced from her own photos and drawings.
