

Spring/Summer 2020 Collection – ONDULATIONS

New direction!

The flowery waters set the tone: a lively, joyful and animated collection. An immersion in a universe full of flowers just like a tribute to our iconic silk Nympheas square created for the Musée de l'Orangerie.

The waters of the ocean embody freedom, calm and serenity, the power to sail to a new sea where Baudelaire whispered in our ear “You will cherish the sea”.

Beyond the encounter between two living waters, two important worlds for the Petrusse House, it is also the meeting between two worlds and a unique know-how: India where the Petrusse shawls are finely woven following the rules of art driven by rigorously selected craftsmen, and France where we master the printing know-how.

Our “Made in France” odyssey is witnessed proudly on our flagship products of the collection: 100% French linen, produced and woven in France, impressions in France following tradition and respecting the material, finishing touches made in our workshop in which we also have a multitude of ideas, collaborations, and products reinvented with an upcycling spirit.

Petrusse enters brilliantly into a sustainable and responsible era where each stage of the chain is ethical, respected and thought to last.
