SPRING - SUMMER 2021

Every Pijama soft case and bag is composed of three layers of different materials: polyester jersey inside, neoprene and the external fabric that gives the final look. Each new material is approached with curiosity and a genuine passion for crazy experimentation.

This summer we're proud to say that all the three new fabrics we're introducing don't just look good, they're also good for the environment. They're made with 100% recycled polyester, 100% organic cotton and a mix of the two of them. We're also presenting a new model design in four sizes, dedicated to the devices, but that can be also used as lifestyle accessories, blurring the boundaries between the two categories.

LUREX TURTLE

RECYCLED POLYESTER - ORGANIC COTTON - LUREX & NEOPRENE

This summer we go beyond our classic optical geometries, willing to explore more organic patterns, inspired by nature. The lurex turtle fabric is made of recycled polyester, organic cotton, and of course lurex .

LUREX TURTLE

REVERSE CAMO

RECYCLED POLYESTER & NEOPRENE

Why reverse? Because the goal of camouflage is to blend the object into its environment. This mix of red, blue and grey colors aims exactly the opposite: to make it stand out. Fabric made of 100% recycled polyester.

SERIOUS CHECK

ORGANIC COTTON & NEOPRENE

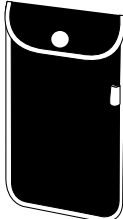

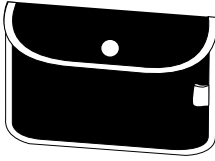

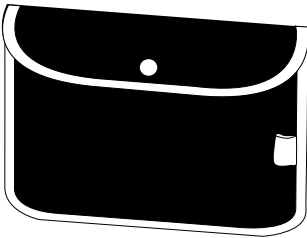

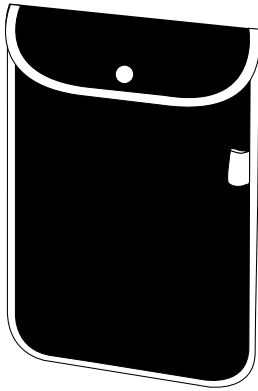

After the happy check from last summer it's now time for the serious check. A minimal tartan pattern in black, indigo and raw grey, made of 100% organic cotton.

Pijama was born in 2006 from an idea by Monica Battistella, designer, and Sergio Gobbi, architect.

As soon as they realised that Milan and its surroundings were full of abandoned fabric stocks, they decided to give them new life.

It all started with scratch proof soft cases for Powerbook, iPods and vinyl records; then the family grew to include bags, backpacks and all lifestyle products.
