

STEP IT UP™ FOR THE ENVIRONMENT

UMAGE is introducing a new step stool that will help you to reach the higher shelves in the kitchen and encourage you to step it up for the environment – hence the name.

Step It Up™ holds a storage bag that can be taken out and used for grocery shopping, to store your recycled bottles, or other things that you simply need space to store. The new step stool encourages you to minimise the use of plastic bags and sort your recyclable waste, making it easier to take better care for the environment in your everyday life, while enhancing the functionality in our living space.

The step stool comes in two subtle and two vibrant colours so there a little something for every taste. You can step up from three sides of the stepping stool and it has antifriction shoes to make sure you always have a steady balance on the stool. The bag can be washed in the washer on 30 degrees.

At UMAGE, we care about everyone we influence. We make functional and timeless designs that last, we optimise storage and transportation costs with flat-packed designs, to make luxury

accessible to you. The aim is to save the environment so that you can save on living.
