## Company Profile

Living Mediteraneo brand is an activity created in 2019 under the group Koklas Wood Construction as a e-shop platform and the idea was to spread our design furniture and object creations all over the world.

Living Mediteraneo brand designs and manufactures mostly handmade wooden furniture and other decorative constructions for residential areas, industrial areas and hospitality projects. Our creations are of solid wood, plywood or ecological crafted products often with a twist of mixed natural materials, like meta, marble etc.

Ecological products, upcycling and sustainable philosophy, added value products promotion are preferred from the brand in order to share a fresh look of design with our old and new customers.

Our goal is Living Mediteraneo to be constantly enriched with various products that highlight the Mediterranean design and lifestyle.

In addition, Living Mediteraneo, wishing to contribute with a positive social value, favours the selection of workforce coming from vulnerable groups and the support of FSC plantation trees in European area.

Stathis Koklas as designer and inspirer of the whole project has always as priority the high quality and original but, at the same time, timeless creations.

This is why Living Mediteraneo is dedicated to help our customers discover their style and their own design personality.

Hoping that people will join our dream, we invest in a better life.
