### New Spaces 2020

The new normal has allowed us to slow down and explore specific areas of our brand, and our vision has evolved. We believe in New spaces, spaces designed for a purpose, spaces that represent people. The concept of New Spaces reflects an exciting shift in how we engage with our environment. The latest additions to our family of things are versatile, well crafted and original. From material to finish, and from the silhouette to functionality, each element has its own personality that speaks to your chosen environment. Each piece says something about you, it'll have a

voice within your space, and a place in your world for years to come. The collection is designed as a family of things that can work harmoniously in a multitude of environments, whether it's a home, office, restaurant or a hotel. Our use of highly texturized finishes, smooth glossy surfaces, and characterized shapes promotes an eclectic-contemporary style. We design from within, we understand what makes us feel good, we firmly believe it'll make you feel good, and we build upon our instinct; we do things in our own way.

«  
**Point of Interest**
