

# Organic herbal teas

## Drink it

Inspired by the ecosystem complexity, five conceptual organic herbal tea blends with different properties. Whole herbal leaves, flowers and fruits, sourced by small scale organic family farms, are meticulously packed by hand in ecological packages. They are naturally caffeine free, without flavours, sweeteners or any other forms of additives.

## Plant it

When the content is finished, the container can be reused! In each package, there is a seed-stick which can be planted inside, giving the opportunity to the consumer to grow their own herbs. Due to its biodegradable quality, the container can be incorporated into the ground leaving zero residues.
