

SS/2022 EDITION

PHOTO: HASSELBLAD STUDIO

"Through the camera lens I can see structures that are otherwise hidden to the naked eye which fascinates me."

- Göran Liljeberg

A TRUE PASSION FOR INSECTS, NATURE AND PHOTOGRAPHY

LILJEBERGS is a collection of images based on my photos of insects & other objects of nature. Behind my images are my great passion for insects, nature and many years of dedication to photography. Many of the photos has been used as illustrations in a variety of books but are now mainly used as art in home and public decor.

The insects that are used are mostly borrowed from various museums and from my entomology colleagues and their collections.

I photograph and print everything in my own studio. Each image consists of sometimes up to hundred images that have been packed together with different depths of sharpness to create as detailed and realistic images as possible. This macro technique allows you to enlarge the images at great magnification without losing any sharpness or quality.

The prints are all from highend 11-color inkjet printers. The images are printed on a matte 200 gram quality paper with pigment inks of the highest quality with a very long life span. This gives a quality and durability that far exceeds traditional offset printing.

Macro photography of small objects in large magnification has become my specialty. The goal is to show nature as it looks, with the detail, sharpness and color gamut required.

Today LILJEBERGS supply over 700 different prints of insects, botanicals, minerals & other objects from nature.

GÖRAN LILJEBERG

A TASTE FOR NATURE

Our images can be used in a variety of ways. Here are some inspiration from interior designers, stylists, interior magazines and from some of our resellers.

SELECTING BACKGROUND AND FORMAT

You can choose between two versions of almost all our designs. When choosing **WHITE BACKGROUND, NO NAME** you get a greater contrast between the motif and the background - a more graphic look. When choosing **TINTED BACKGROUND WITH NAME** the contrast is softer, and you get a white border around it, like a built in passepartout - a more classic look. If you choose the tinted background you will also get the scientific name printed under the motif. There is also a third background on some of our prints; **TINTED BACKGROUND EDGE TO EDGE - NO NAME**, where there is no white passepartout and no name printed. We also have a small range on a pastel background and a range on a pitch black background.

Our standard sizes: A4(21x29,7cm), 30x40 cm, 40x50 cm, 50x70 cm and 70x100 cm. Note that not all of our prints are available in all sizes. *Please check our website to see available sizes and backgrounds on each design.* We can also customise sizes and designs upon your request. Mini prints are in size 15x15 cm and A5(15x21cm).

Our botanical range is quite new and something we are developing to be a larger part of our collection. They are photographed with the same macro technique as our bugs so they are highly detailed and in supreme quality. We plan to release new botanical prints through out the year so keep your eyes open...! They come either on plain white background or on a darker shade of tinted background that is printed edge to edge (like shown here).

FRAMES & PRINT HANGERS

Magnetic hanger - black

Magnetic hanger - oak

The frames are in natural solid oak or in black painted wood, they are all with acrylic (plexi) glass. The MDF backing is attached to the frame with metal clips and it is equipped with two hangers. Size A4 also have a back support for standing. The frame is 18 mm thick with a 12 mm wide profile. All our frames are FSC-certified wood products produced from well-managed forests &/or recycled materials.

The magnetic hangers comes in natural solid oak or black painted wood and are attached to the print with magnets. Mounted they are 10 mm thick and 20 mm wide.

The mini frames are black painted wood with normal glass and has a back support for standing. The frame is 12 mm thick with a 12 mm wide profile.
