

PREMIUM PAPER

Cradle to Cradle for our favorite premium paper

For years we have been using the premium paper Munken for our nuuna collection. Manufactured in a Swedish paper mill, this fine paper with its uncoated, smooth surface has an extremely pleasant feel and can be written on wonderfully - our absolute favorite.

Munken paper is not only FSC® certified and thus comes from sustainably managed forests. Since the summer of 2020, the premium paper has also been freshly awarded the Cradle to Cradle certificate on top. Cradle to Cradle stands for a self-contained circular economy, no resources are wasted, no environmentally harmful waste is produced, but is composted or recycled after use: a radical alternative to the throwaway society and further confirmation for us that we are doing everything right with this paper.

Speaking of sustainability: We produce 100% in Germany out of conviction. No overseas imports, no dubious working conditions, no environmental sins. Our notebooks are produced regionally in compliance with the highest environmental, social and safety standards in a small manufactory, where we know exactly what we get: the most intensive screen prints and the highest quality thread bindings, for example. So, if you buy a notebook from nuuna, you can be sure: This product has not been manufactured anywhere, but with the best materials and a lot of love on site.
