for

KOUSTRUP & CO.

A new cooperation between Koustrup & Co. and designer and multiartist Jim Lyngvild has formed. This has resulted in the collection TREASURES which is the essence of hidden gems through history. It is a mix of old and new, of classic and modern. High quality materials and elegant design.

"To travel through our common cultural heritage is a gift for me. Grandma's china, old books with baroque carvings or vintage stores to find hidden and forgotten gems. That is what has inspired me for the TREASURES collection and we start our journey with handpainted vintage tiles from England and Holland with different shades of blue".

"The most important thing with the collection is that it combines the fine with the raw and unpolished and the collection can be mixed with cheap and expensive, with heirlooms, the vintage bought and the wedding gifts. It is when the personal taste and thought comes to life we create an exciting universe of perfect imperfection".
