

BELGIAN LIGHTING COMPANY AUTHENTAGE LAUNCHES 'CREATE YOUR OWN BELLEFEU'

Authentage is a manufacturer of authentic lighting produced from high-qualitative materials (such as brass) combined with the latest lighting technology. Our main focus is on ambiance creation. We think along with the customer and strive for flexible solutions. Not only do we offer customized solutions, but we also give our customers the opportunity to work with our Bellefeu LED technology* and create their own unique creation. This under the name Create your own Bellefeu which is available for indoor and outdoor applications. An example of this is our Bellefeu technology combined with our groundspot Subtile. By placing candles on top of the spot one immediately creates a warm, romantic atmosphere.

*Bellefeu LED technology is our patented in-house led technology that replicates real candlelight.

Would you like to discuss the possibilities for your own project?
