*empilable*

## Stemmed glass

The Ouessant collection has become a flagship range for La Rochère. Inspired by the design of the bottoms of Breton canoes, the collection has the ruggedness and simplicity of the Finistère coast and its islands. Its design has been adopted by both private individuals and professional bistronomists. The new stemmed glass completes the range, with the added advantage of being stackable, ideal for everyday use and for saving space in your storage areas.
