PORCEL New Winter '19 Collections

Fully designed with Portuguese tiles as the main source of inspiration, **Blue Legacy** pieces feature the well desired cobalt blue over the white porcelain bodies. Cobalt blue, high fired at 1400°C, will be elegantly highlighted, and become the main color touching both tableware and decorative pieces, with a wide spread of elements covering the pieces with patterns and textures.

Adamastor is the other new collection, with a set of selected table and statement pieces fully covered with a strong texture that draws inspiration from the Ocean and the Portuguese Discovery Age. Adamastor is the name of a mythological character from the literature piece "Os Lusíadas" that manifests itself as a storm to symbolize the dangers of the sea which Portuguese sailors had to overcome. The texture used for Adamastor portrays that formidable deep ocean storm and embodies a strong connection with the ocean and the Portuguese historical background.

Designed by Filipa Ricardo, Adamastor and Blue Legacy, come to complement each other and bring a sophisticated approach to Portuguese history, heritage and culture in the shape of elegantly selected porcelain pieces. Both collections include table and decorative pieces that are fired at 1400°C and hand finished with luxurious gold rims.
