COSMETIC ALGAE BED SHEETS COLLECTION

From Sea To Skin

www.marialma.com

As a Portuguese startup, the sea has always played a preponderant role in the habits and culture of the population. Therefore, MARIALMA decided to take the best of what the sea has to offer and launch its Cosmetic Algae Bed Sheets Collection.

The fabric used on this collection is produced exclusively from sustainable raw materials - wood pulp and seaweed - and using methods that save both energy and resources. Additionally, the fiber is carbon neutral and completely biodegradable.

The seaweed - a marine variety of the algae - is a pure natural element rich in essential substances, such as vitamins, amino acids and minerals. Its high level of antioxidants can protect the skin against harmful free radicals that damage our skin cells, giving it a dry and aged look. These unique properties help to activate cell regeneration, relieve skin diseases, reduce inflammation and soothe itchiness.

The harvesting of the seaweed is a gentle, selective and sustainable process, removing only the part of the seaweed that is able to regenerate. The patented process of embedding the seaweed into a natural cellulose fiber (named the Lyocell process) ensures that the properties of the seaweed are permanently preserved within the useful life of the bed sheets, regardless of multiple washings.

Crafted in Portugal, our bed sheets can positively contribute to the overall improvement of the skin.

MORE ABOUT MARIALMA

Your sleep, our science. That is the motto of the new Portuguese start-up MARIALMA. The company was born out of the necessity of enhancing the way you experience sleep. MARIALMA develops healthy fabrics that can work as antiallergenic and antibacterial elements, so they can be used as a complement in the treatment of specific skin or sleep disorders.

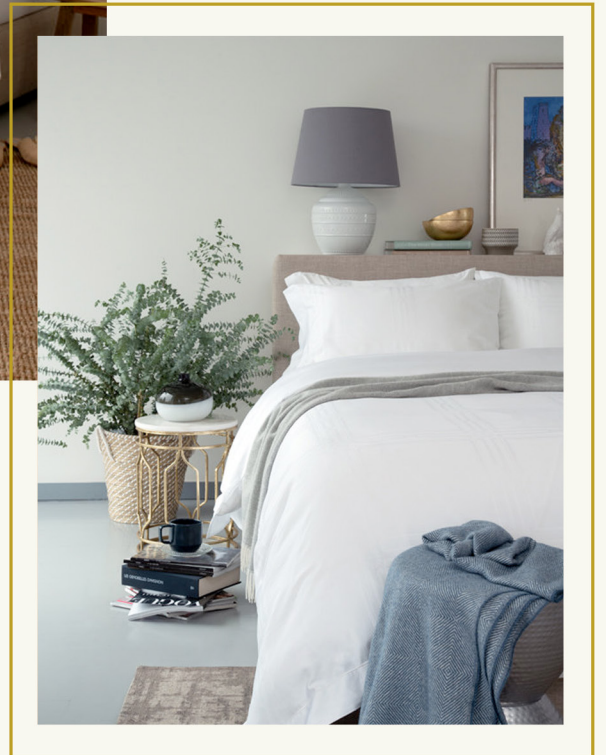

Discover more benefits of Marialma's Cosmetic Algae Bed Sheets Collection on their blog or shop their products here.
