## Introducing the best sheets for sensitive skin.

MARIALMA's healthy and super soft zinc bed sheets are especially beneficial for people with sensitive skin or skin conditions such as eczema or atopic dermatitis.

Using only high-quality, pharmaceutical-grade 4 zinc oxide, the fabric combines zinc's regenerative and skin protective effects with its antibacterial properties that disable the propagation of bacteria. The fiber is produced without the use of aggressive chemicals and is made solely from renewable raw materials, making it both eco-friendly and fully biodegradable.

Combining a sateen weave, 400 TC Egyptian Cotton and a unique yarn made from eucalyptus cellulose fiber that carries the zinc oxide compound, the Sensitive Zinc Bed Sheets Collection was born.

Sensitive Zinc bed sheets are recommended to everyone that suffers from conditions such as eczema, atopic dermatitis, psoriasis, acne and others, thanks to zinc oxide's soothing and anti-inflammatory capabilities. Since zinc is a component of skin-building enzymes, an active exchange between the fiber and the skin occurs. OEKO-TEX certified, this fabric will operate directly on the skin, helping to calm any skin irritation, act as anti-bacterial and anti-odor, plus it can boost cell regeneration.

The patented process of embedding zinc oxide into a natural cellulose fibre (named the Lyocell process) ensures that the properties of the zinc oxide are permanently preserved within the entire lifespan of the bed-sheets, regardless of multiple washings.
