

Colonial style in the interior decoration

Today, we will talk about amazing and very beautiful colonial style of interiors. The colonial style got its name due to the fact that at one time Old England, founded many colonies in different parts of the world and, bringing its traditions to the way of life of the islanders, borrowed the characteristic features of their homes.

Colonial style is a mixture of different ethnic styles in one interior. Elegant items were brought by travelers to Europe for many centuries and bringing an exotic touch to the European interior.

In true colonial houses all the main surfaces (walls, floors, ceilings) have always been decorated in light neutral shades: cream, white or ivory, sand.

Exotics in decorative objects.

Colonial style was introduced where the neighborhood with the wild untouched nature was very natural, so the interior of the houses showed a variety of plant and animal motifs, primarily in textiles, upholstery furniture, and wall paintings.

It is necessary to attract such patterns in the design of rooms to emphasize the colonial style of the interior of your home:

Deciduous motives: palm, fern, arrowroot.

Exotic flowers: orchids, anturium, hibiscus.

It's a good idea to put up in the apartment of indigenous people of warm countries: a miniature palm tree and a realistic soft tiger sculpture made of ecologically pure materials, but showing excellent taste and predilection for travel.
