Fall/Winter novelties 2020

Coppa

The successful "Coppa" collection from ASA SELECTION combines urban-inspired culture of enjoyment with modern style and design expertise. The porcelain service couldn't be more original and authentic. But not only the design principle corresponds to the trend towards clarity and minimalism. The composition of the porcelain series with its multifunctional parts also fulfils the wishes of a modern household. With the teapot with a hand-caressing wooden handle, mugs for tea and more, bowls for muesli or desserts, larger bowls for salad, pasta or soups and dessert plates, you are fully equipped for every occasion. In addition to the delicate spring colors of Coppa Minto, ASA SELECTION now adds two more decors to the successful series: Coppa Sencha for lovers of natural tones and Coppa Kuro for minimalists.

All articles are delivered in attractive gift boxes.

Coppa Sencha: The new decor brings the charm of autumn to the set table. The muted color underlines the authenticity of the handcrafted Coppa shapes. This also makes Sencha a reference to the Japanese tea of the same name, which is one of the most popular green tea varieties with its intense and high-quality taste.

Coppa Kuro: In Japanese, Kuro means black. And black gives the Coppa service a design elegance of the highest order. The purism of form and color is accentuated by an individual speckled effect in the glaze. With the festive matt-gloss shimmer created in this way, Coppa Kuro makes a stylish appearance on the modern Christmas table.

Botella

With pleasantly relaxed re-design, "Botella" vases interpret the classic bottle shape in a trendy way. The highlight of this styling results from the interplay of three different surface structures and a natural color palette, which was expanded with the trend colors saffron and stone for the fall.

The new items also feature a crackle glaze in the upper area, which combines the trend towards craftsmanship with individual design. Made of stoneware, the vases, which are available in two sizes, have the trendy materiality.

Kids tableware Bruno

Bruno the bear and the animals of the forest tell a Christmas story on the Fine Bone China children's tableware from ASA SELECTION. "Christmas for Bruno" is the name of the tableware set that continues the success story of the ASA children's tableware collection launched in 2020. This time again, the focus is on minimalist and at the same time lovingly childish designed décors, which stimulate the imagination of young gourmets. In addition, a matching postcard, with which loving Christmas greetings can be sent, ensures this. And also with this festive special edition of the children's tableware the fun factor is not neglected: On the back of each package you will find a handicraft instruction from Bruno and his friends.

The 5-piece dinnerware set includes a postcard and all the important basics: a dinner plate, a multifunctional bowl, a mug and a spoon, all very lovingly decorated.

A well-saturated, happy bear Bruno is the motif on the placemat that matches the children's tableware set. ASA SELECTION also provides for a nice table suitable for children at Christmas time with "Christmas for Bruno".
