

Outdoor Cushions Spring/Summer 2021

Let's return to spring and the outdoor season. This season we present new items for the outdoors that we would like to tell you more about.

Cushions for the outdoors

Our outdoor are hand printed in 100% cotton and then treated with a water repellent coating similar to that used in outdoor clothing.

The cushions are suitable for shorter periods of exposure to rain and moisture but should not be left outdoors in rain for longer periods. Exposure to sunlight is not a problem.

The cushions have a taped seam (as in all-weather jackets) to prevent water from entering the polyester filling. With no zippers the cushion comes complete with the inner pads and is delivered vacuum packed to the stores.

Care instruction:

- Spot clean with a damp white cloth.
- Shake off excess water, thereafter air dry.
- When not in use keep in dry place.
- Avoid prolonged exposure to rain/moisture.
